

papyrus is a paper insert system designed for organisations that need the facility to generate graphics on their own computers.

papyrus is based on standard paper sizes A5, A4, A3 or any size you like up to full poster format for you to print your own message.

Portrait or landscape format.

A polycarbonate face panel clips into the aluminium extrusion which holds the paper inserts in place.

papyrus "Compass", our curved version for that classic look.

papyrus

papyrus is an internal paper insert doorplate system.

graphics

Total flexibility is possible as the graphics are generated by the customer using any available method of producing paper images.

colour

All products are prepared in a satin silver anodised finish as standard. Coloured anodising or painted finishes are available on request.
